

## **Construction Update E MONTPELIER Route 14 Bridge - week of August 28, 2017**

Hello,

Next week the contractor will finish up the storm drainage on the east end of the US 2 project. Work will also include the final grading of all three lanes at the east end and prepping for the new sidewalk. The ends of the lanes where VT 14 and US 2 meet will be prepped as well. If the paving subcontractor is available, the base layers will be completed on the remainder of the project during the latter part of the week.

This work will take place during night hours, between 7 PM and 7 AM, Sunday through Thursday.

About 900 feet of Route 2 is being rebuilt to accommodate new turning lanes for the VT 14 bridge. A temporary bridge will be put in place in 2017 and will be used when the VT 14 bridge is reconstructed in 2018.

Motorists are advised to reduce speeds within the construction zone. The posted speed limit has been lowered to 25 mph.

It is illegal in Vermont to use any handheld portable electronic devices while driving. The law carries fines of up to \$200 with points assessed if the violation occurs in a work zone.
