

The contractor for the VT 14 Bridge Project, CCS Constructors, INC continues to work on building foundational sections of the new bridge. This week the contractor completed construction of the pier and wingwalls on the VT 14 side of the Winooski River.

Next week the contractor will:

- Complete drilling the final shaft for a pier on the US 2 side of the bridge and pour concrete into the lower section of the newly-drilled shaft.
- Form and pour the upper sections of the shafts for the new pier on the US 2 side of the river.
- Demobilize drilling equipment and materials from the work site.

Traffic impacts for next week...

- On Monday, June 11 and Tuesday, June 12, there will be alternating one-way traffic during non-peak hours of 9:00 AM – 3:00 PM during the actual placement of concrete into the newly drilled shafts and as drilling equipment and materials are demobilized from the site.
- There may be brief, intermittent interruptions to traffic as trucks enter and exit the work site all week.

Please watch out for flaggers and **EXERCISE CAUTION WHILE TRAVELING THROUGH THE WORK ZONE.**

Motorists are advised that the speed limit is 25 m.p.h. and speeding through a construction zone can lead to increased fines.

More information on the project is available on the project website, www.vt14emontpelier.vtransprojects.vermont.gov. People who would like to receive weekly construction updates should contact the project's Public Outreach Coordinator, Jill Barrett, by telephone 802-272-1248 or by email, jbarrett@fhiplan.com.
