

The contractor for the VT 14 Bridge Project, CCS Constructors, INC is making good progress building foundational sections of the new bridge. This week the contractor drilled a shaft on Pier #2 (US 2 side of the river) and poured concrete into it. On the VT 14 side of the river, the contractor continued forming and pouring an 11-foot section of the upper part of Pier #1.

Next week the contractor will:

- Drill a shaft for a pier on the US 2 side of the bridge. This will be the fourth and final shaft.
- Pour concrete into the lower section of the newly-drilled shaft.
- Work on forming and pouring a wingwall on the VT 14 side of the bridge.

Traffic impacts for next week...

- There may be brief, intermittent interruptions to traffic as trucks enter and exit the work site.
- On Wednesday 06/06/18 or Thursday 06/07/18, there will be alternating one-way traffic during non-peak hours of 9:00 AM – 3:00 PM during the actual placement of concrete into the newly drilled shaft.

Please watch out for flaggers and **EXERCISE CAUTION WHILE TRAVELING THROUGH THE WORK ZONE.**

Motorists are advised that the speed limit is 25 m.p.h. and speeding through a construction zone can lead to increased fines.

More information on the project is available on the project website, www.vt14montpelier.vtransprojects.vermont.gov. People who would like to receive weekly construction updates should contact the project's Public Outreach Coordinator, Jill Barrett, by telephone 802-272-1248 or by email, jbarrett@fhiplan.com.
